Hiring Team

Synapsis Medical Technologies Inc.

Dear Hiring Team,

I'm excited to apply for the Software Engineer Intern role at Synapsis Medical Technologies. I'm currently a Master's student in Engineering Physics at NIT Warangal with hands-on experience in full-stack web development and a deep interest in building practical tech solutions.

I recently built an AI image generator app using Hugging Face and Replicate APIs, integrating JWT, Google OAuth, and Zod for schema validation and secure user auth. I also developed an algorithm visualizer to understand sorting and pathfinding logics, which helped sharpen both my front-end and problem-solving skills. My core tech stack includes JavaScript, TypeScript, React.js, Node.js, and MongoDB.

The opportunity to contribute to Synapsis's innovative work in health tech excites me. I'm eager to learn from your team and contribute meaningfully to projects that have real-world impact.

Thank you for considering my application. I've submitted the required form and look forward to hearing from you.

Best regards,

Satyam Kumar
